\$healthInfo

\$healthInfo : array<mixed,\Healthsvc\InfoItem>

Type

array<mixed,\Healthsvc\InfoItem> — test info as assoc array of health info items, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

private

\$execExitStatus

\$execExitStatus : array<mixed,integer>

Type

array<mixed,integer> — exit status codes as assoc array of exit status codes, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

private

\$healthSuccess

\$healthSuccess : array<mixed,string>

Type

array<mixed,string> — array containing the label of every successful test

Inherited from

[\Healthsvc\StatusData](#)

Tags

private

\$healthWarn

\$healthWarn : array<mixed,\Healthsvc\InfoItem>

Type

array<mixed,[\Healthsvc\InfoItem](#)> — health warnings as assoc array of health info items, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

private

\$healthFailure

\$healthFailure : array<mixed,\Healthsvc\InfoItem>

Type

array<mixed,[\Healthsvc\InfoItem](#)> — health failures as assoc array of health info items, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

private

\$hostname

\$hostname : string

Type

string — string reported hostname

Tags

private

Methods

hasNoTests()

hasNoTests()

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

hasAnyTest()

hasAnyTest()

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthStatusTime()

getHealthStatusTime() : string

Returns

string —

ISO 8601 timestamp of when health status generated

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthStatusTtl()

getHealthStatusTtl() : integer

Returns

integer —

health status time to live

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthInfo()

getHealthInfo() : array<mixed,\Healthsvc\InfoItem>

Returns

array<mixed,[\Healthsvc\InfoItem](#)> —

test info as assoc array of health info items, the element keys are the correspondong test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getExecExitStatus()

getExecExitStatus() : array<mixed,integer>

Returns

array<mixed,integer> —

exit status codes as assoc array of exit status codes, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthSuccess()

getHealthSuccess() : array<mixed,string>

Returns

array<mixed,string> —

array containing the label of every successful test

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthWarn()

getHealthWarn() : array<mixed,\Healthsvc\InfoItem>

Returns

array<mixed,[\Healthsvc\InfoItem](#)> —

health warnings as assoc array of health info items, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getHealthFailure()

getHealthFailure() : array<mixed,\Healthsvc\InfoItem>

Returns

array<mixed,[\Healthsvc\InfoItem](#)> —

health failures as assoc array of health info items, the element keys are the corresponding test label

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

getMessage()

getMessage() : string

Returns

string —

response message

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

setExecExitStatus()

setExecExitStatus(\Healthsvc\string \$label, \Healthsvc\int \$exit_status)

Parameters

\Healthsvc\string \$label

\Healthsvc\int \$exit_status

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

setHealthFailure()

setHealthFailure(\Healthsvc\string \$label, \Healthsvc\InfolItem \$health_failure)

Parameters

\Healthsvc\string \$label

[\Healthsvc\InfolItem](#) \$health_failure

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

setHealthWarn()

setHealthWarn(\Healthsvc\string \$label, \Healthsvc\InfolItem \$health_warn)

Parameters

\Healthsvc\string \$label

[\Healthsvc\InfolItem](#) \$health_warn

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

hasAllHealthSuccess()

hasAllHealthSuccess()

Inherited from
[\Healthsvc\StatusData](#)

Tags

None found

hasAnyHealthFailure()

hasAnyHealthFailure()

Inherited from
[\Healthsvc\StatusData](#)

Tags

None found

hasAnyHealthWarn()

hasAnyHealthWarn()

Inherited from
[\Healthsvc\StatusData](#)

Tags

None found

hasExecExitStatus()

hasExecExitStatus(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Inherited from
[\Healthsvc\StatusData](#)

Tags

None found

hasHealthFailure()

hasHealthFailure(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Inherited from
[\Healthsvc\StatusData](#)

Tags

None found

moveHealthFailureToWarn()

moveHealthFailureToWarn(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

setHealthSuccess()

setHealthSuccess(\Healthsvc\string \$label, \Healthsvc\InfoItem \$success_info = null)

Parameters

\Healthsvc\string \$label

[\Healthsvc\InfoItem](#) \$success_info

Inherited from

[\Healthsvc\StatusData](#)

Tags

None found

__construct()

__construct(\Healthsvc\int \$healthStatusTtl, \Healthsvc\string \$healthStatusTime = null, \Healthsvc\string \$hostname = "")

Parameters

\Healthsvc\int \$healthStatusTtl

\Healthsvc\string \$healthStatusTime

\Healthsvc\string \$hostname

Tags

None found

jsonSerialize()

jsonSerialize()

Part of the JsonSerializerable interface

Inherited from

toArray()

toArray() : array

Provides an assoc array corresponding to this response data item

Returns

array

Inherited from

[\Healthsvc\SerializableData](#)

Tags

None found

getHostname()

getHostname() : string

Returns

string —

string reported hostname

Tags

None found

refreshMessage()

refreshMessage()

Constants

JSON_CONTENT_TYPE

JSON_CONTENT_TYPE

Tags

None found

Properties

\$hasResponseData

\$hasResponseData : boolean

Type

boolean — true if the response body corresponds to response data, otherwise **bool** false

Tags

private

\$responseData

\$responseData : array

Type

array — response data corresponding to the response body

Tags

private

\$responseBody

\$responseBody : string

Type

string — response body

Tags

private

\$contentType

contentType : string

\$contentType : string

Type

string — response content type

Tags

private

\$responseCode

\$responseCode : integer

Type

integer — HTTP response code

Tags

private

Methods

getResponseCode()

getResponseCode() : integer

Returns

integer —

HTTP response code

final

Tags

None found

hasResponseData()

hasResponseData() : boolean

Returns

boolean —

true if the response body corresponds to response data, otherwise **bool** false

final

Tags

None found

getResponseData()

getResponseData() : array

Returns

array —

response data corresponding to the response body

final

Tags

None found

getContentType()

getContentType() : string

Returns

string —

response content type

final

Tags

None found

getResponseBody()

getResponseBody() : string

Returns

string —

response body

final

Tags

None found

printResponseBody()

printResponseBody(boolean \$send_headers = true) : void

*Prints the response body. Additionally sends the appropriate HTTP headers unless **\$send_headers** is *<i>>false</i>*.*

Parameters

boolean \$send_headers Optionally set to *false* to suppress sending HTTP headers.

final

Tags

None found

setResponseBody()

setResponseBody(\Healthsvc\string \$response_body, \Healthsvc\string \$content_type, \Healthsvc\int \$response_code = 200)

Parameters

```
\Healthsvc\string $response_body
\Healthsvc\string $content_type

\Healthsvc\int    $response_code
```

final

Tags

None found

setResponseData()

```
setResponseData(array $response_data, \Healthsvc\int $response_code = 200)
```

Parameters

```
array    $response_data
\Healthsvc\int $response_code
```

final

Tags

None found

getHealthSuccess()

getHealthSuccess() : array<mixed,string>

Returns

array<mixed,string> —

array containing the label of every successful test

Tags

None found

getHealthWarn()

getHealthWarn() : array<mixed,\Healthsvc\InfoItem>

Returns

array<mixed,[\Healthsvc\InfoItem](#)> —

health warnings as assoc array of health info items, the element keys are the corresponding test label

Tags

None found

getHealthFailure()

getHealthFailure() : array<mixed,\Healthsvc\InfoItem>

Returns

array<mixed,[\Healthsvc\InfoItem](#)> —

health failures as assoc array of health info items, the element keys are the corresponding test label

Tags

None found

getMessage()

getMessage() : string

Returns

string —

response message

Tags

None found

setExecExitStatus()

```
setExecExitStatus(\Healthsvc\string $label, \Healthsvc\int $exit_status)
```

Parameters

```
\Healthsvc\string $label  
\Healthsvc\int $exit_status
```

Tags

None found

setHealthFailure()

```
setHealthFailure(\Healthsvc\string $label, \Healthsvc\Infoltem $health_failure)
```

Parameters

```
\Healthsvc\string $label  
\Healthsvc\Infoltem $health_failure
```

Tags

None found

setHealthWarn()

```
setHealthWarn(\Healthsvc\string $label, \Healthsvc\Infoltem $health_warn)
```

Parameters

```
\Healthsvc\string $label  
\Healthsvc\Infoltem $health_warn
```

Tags

None found

hasAllHealthSuccess()

```
hasAllHealthSuccess()
```

Tags

None found

hasAnyHealthFailure()

```
hasAnyHealthFailure()
```

Tags

hasAnyHealthWarn()

```
hasAnyHealthWarn()
```

Tags

None found

hasExecExitStatus()

hasExecExitStatus(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Tags

None found

hasHealthFailure()

hasHealthFailure(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Tags

None found

moveHealthFailureToWarn()

moveHealthFailureToWarn(\Healthsvc\string \$label)

Parameters

\Healthsvc\string \$label

Tags

None found

setHealthSuccess()

setHealthSuccess(\Healthsvc\string \$label, \Healthsvc\InfoItem \$success_info = null)

Parameters

\Healthsvc\string \$label

[\Healthsvc\InfoItem](#) \$success_info

Tags

None found

__construct()

__construct(\Healthsvc\int \$health_staus_ttl, \Healthsvc\string \$health_status_time = null)

Parameters

\Healthsvc\int \$health_staus_ttl

\Healthsvc\string \$health_status_time

Tags

None found
